Marshall F. Crouch, Physics Department

Case Amateur Radio Club

The enclosed application for renewal of the club station license of the Case Amateur Radio Club requires the signature of an Institute official in Item 13. Last year Mr. Clifford Nelson affixed his signature here, therefore, I assume that your signature is required on this renewal application. I would appreciate it if you could perform this service for us.

The club operates a station in the basement of the Main Building with about 30 students participating. The organization has the approval of Dean Baker's office and the Case Senate. The Institute provides no equipment whatever, which is a rather shameful state of affairs, since this is a most appropriate activity for an engineering college, and it is generally felt that an activity such as this complements the regular course offerings in radio communications. However, there is a very enthusiastic group involved, and they operate entirely with equipment loaned by members. I feel that they should be encouraged.
